

Fleet Tracking

What is it?

This solution is for everyone and anyone who has a fleet of vehicles that need GPS Tracking and Monitoring. We provide a web based solution. Fleet Track is an economical solution for small and medium businesses, that want to become operationally smart, streamline processes and keep a lid on wastage of time and resources.

Features of the software

- Web based.
- 180 days, up to 1 year of online vehicle reporting.
- Suburb and Street level reporting.
- Mileage Reporting
- Waypoint and Geo - Coding (Define your own points and give them a name like "Sydney Depot" or "Customer A Factory".
- Over Speeding Reports.
- Start and Stop reporting based on internal motion sensor.
- Geo-fencing or zoning. Define on-enter or on-exit location alerts.
- Critical System Alerts to unlimited supervisors via e-mail or optionally via SMS.
- Online web based configuration of the unit to stop/start unit, change tracking interval, poll the unit etc.

- Data export to Google Earth with option to view live tracking.
- Fleet Control and View functions via control room software.
- Over 5000 units can be tracked live over several monitors using the control room software.
- Multiple time zone support. Every unit can report according to its time zone or one central time zone.
- Control Room software provides audible and visual alerts to critical system alerts.
- Not limited to one type of hardware - one account can have a mix of vehicle and personnel tracking units.
- Usage reporting and support for Subscription services.
- Product open to user specific customisation.

The tracking unit

- Internal Antenna (makes for very discreet installation). External antenna optional.
- GPRS/SMS - quad band unit - works on all continents.
- Patented motion sensor - unit sends location whenever it moves and at configured tracking interval while moving.

- Remotely (OTA) programmable.
- 1028 location stored in on-board memory.
- On-board geo-fencing besides server side geo-fencing provided by Global GPS.
- Inputs and outputs for external sensors.
- Internal over speeding detection mechanism.
- Highly configurable with run time meters and ability to configure unit start up and shut down times.

Where is it supported?

We support tracking globally and installation will be from our qualified technicians.

What are the costs?

One time cost for the GPS hardware. Subscription is available in Australia, USA, Canada and India.

The SIM card for the GPS unit needs to be provided by you or will be provided by us in the subscription model.

This is the most cost effective solution on the market today with all features of the higher end cost systems.
